## STEYR MONOBLOC

The new STEYR MONOBLOC sets new standards for innovative hunting rifles – you can find all details about the STEYR MONOBLOC in a separate price list.

### RELIABILITY

An all-metal weapon for absolute robustness made accordingly to military standards

### PRECISION

New "monobloc" construction, in which barrel and housing are hammer forged out of one piece of steel

### ERGONOMICS

Top ergonomic stock with numerous, innovative options to adapt

### SAFETY

State of the art safety features such as hand cocking system, bolt lock and removable trigger unit

For the STEYR MONOBLOC there is a separate price list – please ask your sales manager for details.

## **MANNOX® surface**

### **MANNOX® - the new innovative surface of STEYR MANNLICHER**

In the course of permanent product improvement, STEYR ARMS has established a new innovative surface for all products during 2006. The new MANNOX surface combines a matt deluxe, black optic with outstanding functional preferences:

- 100% corrosion resistance!  
The new surface is absolutely non-sensitive against rain, humidity, sweat and game blood.
- Highest resistance against rubbing!  
The new surface avoids from abrasion or damaging of the outer metallparts in the daily use through f.e. clothes, backpack slings, etc.
- Minimum reflection!  
The matt deluxe, black surface avoids reflections of sun and moon rays. Thanks to that the rifle is not noticeable for the game.

STEYR MANNLICHER SM 12®  
with MANNOX® surface

## ***The 2+1 Safety System***

### **Safe Position**

In this position the weapon can be loaded and unloaded. The trigger is locked, which prevents unintentionally firing.

### **Fire Position**

Just before you intend to shoot, you roll the safety wheel noiseless forward from the Safe Position into the Fire Position.

### **Optional: Locking Position**

A button on the safety wheel prevents the unwanted rolling of the safety wheel from the Locking Position into another position. Trigger and bolt are locked. Depressing the bolt into its lowest position additionally locks the fire pin, too. "Set Triggers" are automatically unlocked in this position.

All safety positions can be easily operated, ambidextrous, function noiseless, and are ergonomically positioned on top of the rifle's pistol grip.

## ***H.C.S.™ the hand cocking system of the STEYR MANNLICHER SM 12®***

The ergonomic and easy to operate hand cocking system (H.C.S.™) sets new standards for all hunting situations.

The weapon is in safe position. A set trigger is automatically unlocked

The weapon is ready to fire, the firing pin is cocked.

## STEYR ARMS PRICE LIST 2023

### **STEYR Safe Bolt System (SBS)**

The SBS (Safe Bolt System) from STEYR ARMS.

The STEYR ARMS invention and patented SBS (Safe Bolt System) is said to be the safest rifle concept worldwide. The Shooter is always protected against outgoing gas and weapon blasts even in case of unexpected overpressure. This maximum of safety is based on the following:

#### **Ice and residue grooves**

Special grooves machined into the bolt guarantees the reliable operation of the rifle, even under extreme environmental conditions, such as mud or ice.

#### **Firing pin**

At the rear of the Bolt the firing pin indicates the cocked position – touchable and visible.

#### **Bolt head**

The front locking lugs of the SBS are extremely massive by design, which lock directly behind the cartridge case into the receiver

#### **Bolt Handle**

The Bolt handle also locks into the receiver.

#### **Safety Bushing**

Only the patented SBS uses an additional safety bushing, which fully encases the lugs and extractor.

In essence, the shooter is fully protected against escaping, high pressure gases, in case an over pressure round is unintentionally fired. Therefore, the SBS effectively prevents the rupturing of the rifle's receiver

**Left: Lock bushing without safety bushing**

**Right: Lock bushing with safety bushing**

## ***An overview of all the advantages***

### **Enhanced Safety**

- The magazine can be set to an additional lower position to assure that no round is fed when cycling the bolt.
- In locking position the set trigger is automatically decocked and cannot be reactivated until the safety is taken off again. The same happens when decocking the H.C.S.™
- In the locking position the firing pin can be blocked completely by depressing the bolt in the lowest position (only models with 2+1 stage safety)
- User friendly 2+1 safety. The bolt can only be removed and reinstalled when the safety is on.

### **Enhanced Reliability**

- All safety related components of the lock bolt are arranged inside and protected against dirt and dust.
- Absolute reliability at temperatures ranging from +70°C to -40°C.
- The ice and residue groove on the bolt body also adds to its top functionality even under the most adverse conditions.
- The SBS front locking system enhances the reliability at high chamber pressures.
- The four point magazine catch design ensures perfect feeding at all times.

### **Enhanced Comfort**

- The double-column magazine is easy to load.
- 70° locking angle only due to the dual lug twin row lockbolt design
- When the firing pin is secured the bolt handle rests closely at the stock and automatically flips back in position when safety is deactivated.
- The firing position allows rapid reloading to facilitate a fast follow-up shot if needed.

## STEYR ARMS LEAD FREE EDITION

Following our tradition to innovate, STEYR ARMS takes the challenges of the future and presents with its lead free editions, the first rifles especially designed for today's standard lead free ammunition. The new barrel profile with six lands and grooves is optimized for solids. The less flexible solids proceed much more evenly into the barrel due to the smaller diameter of the fields. Lead free editions are available for the STEYR MANNLICHER SM12® and STEYR MANNLICHER CL II models, in .30-06 Spr. More calibers to come!

For faster recognition, the Laser engraving on the Receiver is green coloured and the serialnumbers start with LF.

**Surcharge for the Lead Free Edition is EUR 200,- (Suggested Retail Price)**

## NEW! STEYR BREEZER

Steyr Arms introduces a new generation of silencers – the STEYR BREEZER.

The STEYR BREEZER is available in 2 different versions as a thread on silencer (STEYR BREEZER MSD) and as an overbarrel silencer (STEYR BREEZER OSD).

## NEW! Coloured STEYR BREEZER for .30 calibers with M15x1 thread.

For the STEYR AUG we are happy to offer the STEYR UMS (Universal Military Suppressor) with a QD-mount for the STEYR AUG muzzle device.

## STEYR ARMS PRICE LIST 2023

# STEYR MANNLICHER CL II

The successor of the famous MANNLICHER CLASSIC: the STEYR MANNLICHER CL II.

The technical features including the patented SBS™ (safe bolt system) coupled with the new, elegant and ergonomical optimized stock which gives it the highest comfort with a maximum on precision and reliability. This is the quality STEYR ARMS is well known for.

The stock with Bavarian cheek piece and double flame, elegant checkering is optimized for the use with scopes.

STEYR ARMS's O.B.P.™ (optimize barrel profile) guarantees highest precision thanks to its optimized contour and length and fits perfectly into the new designed stock.

The combination of the new barrel and slim housing design are giving the STEYR MANNLICHER CL II an elegant look.

**All STEYR MANNLICHER CLII without open sights are factory threaded (M15x1, Semi Weight M18x1)**

### **STEYR CARBON for SM12 and CL II models**

STEYR CARBON

For various SM12 and CL II models we now offer a Carbon Fibre version – the STEYR CARBON. With its lightweight and robust new designed Carbon Fibre stock the new STEYR CARBON is a desirable rifle for the modern hunter as well as for the demanding sport shooter.

All STEYR Carbon rifles are equipped with a special muzzle thread that allows mounting the new STEYR FlexSight.

#### Thread sizes:

- M15x1 for Standard and light barrels
- 5/28-24 UNEF for 6,5 Creedmoor
- M18x1 for .338 Lap.Mag.

The STEYR CARBON is available in the following models and calibers:

- STEYR CARBON SM12 or CL II Halfstock in .308 Win., .270 Win., .30-06 Spr. and .300 Win.Mag.
- STEYR CARBON SM12 or CL II Light in 308 Win., .270 Win., .30-06 Spr
- STEYR CARBON SM12 or CL II Heavy barrel in 6,5 Creedmoor or .338 Lap.Mag.

The STEYR CARBON is delivered in a special gun bag, a STEYR CARBON Cap and Notebook.

### ***CUSTOM SHOP for STEYR MANNLICHER SM 12® and CL II***

STEYR ARMS revives the century old, highly exclusive technique of coloured case hardening. The Antique models unite traditional finish with state-of-the-art arms technology.

The visually pleasing Antique models comprise a special coloured case hardening finish of housing, bolt handle, breech plug cap, magazine cover, screw base, trigger guard, rear sight base and front sight base.

In addition, barrel and system screws get a blued finish.

Besides the ostensible idea of visually pleasing design, this type of surface treatment entails technical advantages too.

The process of hardening causes extremely hard surface conditions of the treated parts, which entails a higher wear resistance. Components treated this way have a higher resistance against corrosion and mechanical stress.

## STEYR ARMS PRICE LIST 2023

The "Antique" models combine exquisite design, first class quality, long lifetime and excellent precision in one exclusive rifle.

With this novelty we want to accommodate the requirements of our customers with exalted requirements.

## Engravings

In by gone times, hunting was a privilege enjoyed only by kings and nobility. Naturally, they only appreciated equipment of the best quality. It is no wonder that for many centuries hunting weapons have been embellished and decorated with engravings.

Today hunting weapons are valued as jewels and investment for many huntsmen. Thus, any decoration or ornament will add to the individual value of their weapon. They are visible expressions of the special importance hunting has in the life of the hunter.

**Pistolgrip cap with engraved game head**

For detailed information concerning the engravings available, please contact your Area Sales Manager.

Open sights for a new rifle (surcharge)		400,--

#### Information for threading barrels:

All rifles from 1996 (SBS) onwards can be threaded as well as all Mannlicher Luxus old model (before 1996). All other Steyr rifles (fe. Steyr Mannlicher S, M, I and SL models) can not be used with silencers and will therefore not be threaded.

For rifles with open sights please note that the front sight is removed and will not be placed on another position. Therefore, a silver marking on the barrel (where the sight was welded to the barrel) will remain visible.

## NEW! STEYR PRO VARMINT

The new STEYR PRO VARMINT is a rifle that combines high fire rates with the proverbial precision of STEYR ARMS. Thanks to that it's the ideal rifle for Varmint shooting, training and competitions at the shooting range. The STEYR PRO VARMINT comes with a highly accurate, cold hammer forged, fluted heavy barrel in stainless. Every rifle is run in the factory which allows superb accuracy out of the box.

The STEYR PRO VARMINT is factory equipped with a Picatinny rail (Mil. Std. 1913 rail), which allows easy mounting of different optics and aiming devices. The bolt handle is designed for fast repeating and the adjustable cheek piece gives a maximum of stability in any shooting position.

Available in the calibers .222 Rem. and .223 Rem., .22-250 Rem, 243 Win. and .308 Win.

## STEYR SCOUT

With a total length of 98 cm and a weight of just 3 kg the STEYR SCOUT is extremely light and compact. The locking mechanism is based on the SBS (Safe Bolt System).

The three positioned roller safety switch rides on the center line of the tang. Both 5- and 10-round (adapter necessary) detachable box magazines may be used. Advanced handling characteristics, a perfect trigger and traditional STEYR ARMS precision combined with unbeatable usability make the STEYR SCOUT rifle the ideal weapon system for fast target acquisition and engagement.

The stock features a spare magazine in the butt stock. The receiver includes flip-up emergency sights.

The bipod integrated in the fore-end stock can be deployed when needed.

#### **Information for the Long Rail system for STEYR SSG 04-A1:**

Please note that the serial number has to be lasered in the longrail system before attaching it to a rifle!  
For example by mounting it on a STEYR SSG 04. Therefore the rifle has to be sent to our work shop!

## STEYR ELITE

STEYR ELITE – The ultimate precision rifle, based on the SBS-system.

Utmost accuracy and safety and yet even more comfortable to use, this rifle meets the marksman's highest demands.

- The locking system bases on the approved system SBS
- The bipod integrated in the fore-end stock can be deployed when needed.
- All bipods available on the market can be mounted on the Nato standard rail integrated in the fore-end stock
- Long Picatinnyrail allows a wide range of optical sights to be mounted.

## NEW!! STEYR AUG SA Z

The civilian Version of the world-famous STEYR AUG is now available in new variants, with muzzle device and quick barrel change option.

It is a gas-operated semi automatic rifle with a picatinny rail (Mil. Std. 1913 rail) which allows quick attachment of various optic devices or original carrying handle with integrated optics.

The "Bull Pup" Design makes it a short handy rifle with high reliability and accuracy.

The STEYR AUG series is famous for its modular concept which permits field stripping into the main groups within a few seconds.

The cold hammer forged, chrome-lined barrel with a twist length 1" in 9" which guaranties high reliability.

### Special models:

We are proud to introduce new special models:

- 1) AUG ARMY SA – Inspired by the famous AUG introduced with the Austrian Armed Forces – this rifle features the olive stock, original 1,5x optics and the typical "tulip-style" muzzle device.
- 2) AUG A3 SWAT SA – Developed for the special demand of todays SWAT teams, this rifle features a short 16" barrel, a top rail with Keymod attachments and integrated flip-up emergency sights, a picatinny rail at the barrel and the new STEYR ARMS case deflector that allows should change.
- 3) AUG A3 Police SA – the shortest available AUG SA with a 15" barrel, an additional railsystem at the barrel with Keymod® and fixed barrel grip as well as a larger magazine release and the Corvus Defensio case deflector.

All STEYR AUG SA are delivered with a 9 rnd. magazine as a standard

Please note that purchasing the STEYR AUG SA is subjected to special regulations. For detailed informations please contact your Sales Manager

## STEYR PISTOLS

The STEYR PISTOLS are exactly what a handgun should be regarding performance, safety and reliability. Aiming at the future!

Their revolutionary design and safety features, including the unique lockable safety system in a self-loading pistol, place the STEYR PISTOLS light years ahead of their competitors.

STEYR ARMS Pistols are world-famous for its future-orientated design and technology as well as ultimate ergonomics and proverbial precision.

The innovative grip frame offers unmatched ergonomics for best pointing characteristics and is equipped with interchangeable backstraps and side plates to configure the grip to the individual shooters hand.

The real Picatinny rail on the lower front frame allows mounting a wide range of white lights and laser aiming devices.

Fast and precise target acquisition due to the innovative triangular/trapezoid sights (also other sights available) and the unique lockable safety system make this semi-automatic pistol what a handgun should be in modern times.

STEYR ARMS has long been known as the leader in the utilisation of advanced synthetics for firearms. Also the materials used in the ultra-rigid frame of this new pistol represent the state-of-the art in the world of handguns.

Not only ergonomics was in the foreground during the development process of the STEYR PISTOLS. Also safety was an important point same as it is on all STEYR ARMS products.

The STEYR PISTOLS are available with two resp. three safety conditions optional:

- *Automatic Trigger- Drop- Firing Pin Safety Mechanism* – In this condition the pistol is safe until the moment the trigger is pulled.
- *Integrated limited access lock with key* - The integrated locking function is activated by a key and prevents firing and disassembling of the pistol.
- *Optional Manual Safety* – Can be activated manually, according to the user's needs. The safety catch can be quickly deactivated by the trigger finger. And the Best it's free of charge.

STEYR ARE products are unbeatable in quality and reliability. Due to their world-wide acclaim of producing the most accurate and durable executive self-defence and hunting firearms, it's no surprise that the pistol series meet these standards as well.

## STEYR PISTOLS Safety

### Safety Condition 1

Automatic Trigger- Drop-Firing Pin Safety Mechanism. In this condition the pistol is safe until the moment the trigger is pulled.

### Safety Condition 2

Optional Manual Safety. Can be activated manually, according to the user's needs. The safety catch can be quickly deactivated by the trigger finger.

### Safety Condition 3

Integrated limited access lock with key. The integrated locking function is activated by a key and prevents firing and dis-assembling of the pistol.

## STEYR PISTOL A2 MF SERIES

The newly designed STEYR PISTOL A2 MF is the newest member in the STEYR ARMS product family. It is available in 3 sizes – (L-Large; M-Medium and C-Compact) with 17rnd magazine, a real picatinny rail (MilStd. 1913) at the forend and a fully adjustable grip. The back strap as well as both sides of the grip are adjustable with different sized inlays to adjust it to the shooters hand. The grip also features a funnel for a quick magazine change. The Pistol is delivered with 3 backstraps and side plates (S, M, L)

# **GENERAL TERMS OF DELIVERY AND PAYMENT OF STEYR ARMS GMBH**

## ***General***

We perform all of our deliveries and services exclusively under the following conditions.

Conflicting customer terms and conditions are not recognised.

Our execution of the order without objection or complaint does not constitute assent to other conditions.

## ***Product information***

Our product information is subject to change and is non-binding. It is our (intellectual) property, including the accompanying enclosures, samples and descriptions, and may not be reproduced or made available to third parties without our consent. At our request, product information must be returned at any time and at the customer's expense.

## ***Contract conclusion***

The customer's order represents a binding offer to us to conclude a purchase contract for the goods ordered. The purchase contract is concluded when we accept the customer's order by means of a written order confirmation or when we actually fill the order and send the goods to the customer.

Import or export licences, foreign exchange permits or other permits that are required for the fulfilment of the contract, in particular for delivery, must be provided by the customer at its own expense, unless otherwise expressly regulated by law or regulation. The customer must make all reasonable efforts to obtain the necessary licences or approvals immediately and to prove their existence or provide them to us at our request.

In the event that not all required licences or approvals have been granted in a demonstrably legally effective manner within a reasonable period set by us, we are entitled to withdraw from the contract by means of a written declaration to the customer. In this case, the customer must reimburse us for all necessary and appropriate costs that we incurred from and in connection with the conclusion of the contract.

## ***Prices and payments***

All prices are in euros ex works and exclusive of statutory value-added tax. Loading, transport costs, transport insurance and environmental protection-related expenses will be charged separately.

We reserve the right to unilaterally adjust the agreed price through an appropriate increase or decrease if, after the conclusion of the contract, changes occur to the factors on which our cost calculation is based - in particular due to wage adjustments from collective agreements, price changes on the part of our suppliers, changes in energy or financing costs, exchange rate fluctuations or taxes and duties.

## STEYR ARMS PRICE LIST 2023

Unless otherwise expressly agreed in individual cases, payments are due immediately after invoicing without any deduction. We reserve the right to only execute orders against prepayment or cash on delivery. Discounts are only granted if this has been separately agreed in writing. The customer is not entitled to, on account warranty or other claims that have not been recognised by us, withhold payments or other services to be provided by it. In the event of default, we are entitled to default interest at the statutory rate, as well as reimbursement of the necessary costs of appropriate out-of-court enforcement and collection measures, including by attorneys or a debt collection service provider, insofar as these costs are reasonably proportionate to the asserted claim. In particular, we must be reimbursed for a dunning fee of EUR 40 per reminder for dunning letters.

### ***Minimum order values/rejection of orders***

For organisational reasons, we cannot accept orders for less than a minimum order value of € 40 per order. We reserve the right to set different minimum order values for individual goods or groups of goods or to accept orders that are below the minimum order value.

In addition, we reserve the right to refuse to accept orders without giving reasons and without notifying the customer.

### ***Returns of goods***

In the case of goods being returned by the customer, a posting fee of € 40 per item will be charged. This does not apply if goods are returned to us for the purpose of checking and fulfilling warranty obligations.

### ***Retention of title***

The delivered goods remain our property until the purchase price has been paid in full, plus any interest on arrears and additional costs, such as collection costs, transport costs, costs for transport insurance and expenses related to environmental protection.

Resale of goods subject to a retention of title is only permitted with our express written consent.

In the event that the goods are permitted to be resold, the customer hereby declares that they assign to us, for the purpose of payment, all claims against the respective purchaser arising from and in connection with the respective sale. This also applies if the goods subject to a retention of title are only part of a complete delivery by the customer to its purchaser.

In addition, we are entitled to, at any time, notify the buyer, who must be named by the customer at our request, of the assignment of claims and to request that payment be made to us.

The customer irrevocably undertakes to transfer any incoming payments from claims assigned to us, up to the amount of our claims against the customer. At our request, the customer must allow us to view its financial records free of charge, to allow inspection by granting access to business premises and the free provision of the necessary aids, to send us copies of them in paper or electronic form free of charge, or to provide the information requested by us and to account for the resold goods and the assigned claims.

Furthermore, the customer is prohibited from pledging our goods that are subject to a retention of title, transferring them as security or granting third parties other real or mandatory rights to them. The customer is obliged to inform third parties of our rights in the event of seizure or

confiscation of our goods subject to retention of title, to notify us immediately and to support us in asserting our property rights, failing which the customer is liable to us for all damages resulting from a violation thereof.

The return of the goods subject to a retention of title does not take place in lieu of payment. In the event that we withdraw from the contract, we are entitled to disposal with the goods that are our property. Any proceeds obtained in the course of disposal with the goods will be used to offset our claim against the customer.

### ***Delivery times***

A delivery date is only accepted as binding if we have expressly promised it in writing and the customer fulfils all of its duties of cooperation.

We are entitled to make partial deliveries and to issue partial invoices.

Announced expected delivery times are non-binding and apply to the time of delivery ex works. In the event of default on binding delivery dates, the customer grants us a grace period of at least four weeks.

In addition, binding delivery deadlines will be extended appropriately if the customer does not meet its obligations or if unforeseen events, events for which we are not responsible, or extraordinary events occur in our plant or in the plant of one of our suppliers, e.g. war, mobilisation, natural disasters or strikes.

After the elimination of obstacles or the completion of the necessary cooperative actions, we are entitled to a reasonable delivery period of at least four weeks.

In the event that the customer withdraws from the contract, all further claims of the customer against us, regardless of the legal basis, are excluded. The only exceptions to this are claims for compensation for damage caused intentionally or through gross negligence by us or persons acting under our responsibility.

### ***Transfer of risk***

The risk passes to the customer upon handover ex works to the customer or the carrier, the customer's agent or other persons named to us by the customer. If the delivery is delayed through no fault of our own, the risk is transferred to the customer upon notification of readiness for dispatch.

### ***Cancellation / right of withdrawal of STEYR ARMS GmbH***

If there are other than only minor changes in the person or in the status of the customer under corporate law, if we become aware of facts that impair the customer's credit or trustworthiness, we are entitled to withdraw from the contract, provided that the customer refuses to make advance payments or provide a security within a reasonable deadline set by us or does not or cannot, to our satisfaction, clarify circumstances that we deem questionable.

## ***Warranty***

We always provide a guarantee in accordance with the statutory regulations, but subject to the following provisions:

The delivered goods are of standard commercial quality. In particular, customary deviations in the product quality, structure and external appearance of the goods are deemed to have been approved by the customer and do not constitute defects.

### **The warranty period is 2 years from delivery of the goods.**

The customer must notify us of any defect in writing within a reasonable period, with a detailed description of the defect and including proof of delivery.

If the notification of defects is not made in full or is not made on time, the goods are deemed to have been approved by the customer and the assertion of claims against us, in particular for errors regarding freedom from defects, is excluded.

At our request, the customer must return the goods that are the subject of the complaint to us for inspection and possible fulfilment of warranty obligations, insofar as these exist in the individual case. The customer must arrange for the goods to be returned to us at its own risk and expense. If the customer does not comply with our request within a period of fourteen days from receipt of the request, this is deemed to be a waiver of the assertion of all rights from warranties and damages, in particular due to any damage caused by defects as well as errors concerning the absence of defects in the goods.

If we are obliged to provide a warranty for defective goods, the defect is generally remedied in the order below, wherein we reserve the right to freely choose the means of satisfying the warranty obligations:

Rework

Replacement of the defective part

Exchange of the defective goods

Price reduction

We reserve the right to refuse rework or exchange of the goods and instead reduce the price or - in the case of other than just minor defects in accordance with § 932 (4) of the Austrian Civil Code (ABGB) - to convert the order to a different product if the improvement or replacement would be impossible for us or would only be possible with a disproportionate amount of effort.

### **Elimination of the defect does not trigger an extension of the warranty period.**

No liability is assumed for defects known or obvious to the customer. There is no guarantee for defects that can be traced back to operational wear and tear, improper use or operator errors, as well as the removal of serial numbers. If the customer continues to use the goods despite having knowledge of a warranty case, this shall constitute a subsequent waiver of all claims from warranty and compensation for damages, in particular due to the defect itself as well as for claims from an error regarding the freedom from defects of the goods.

Unless otherwise stated in these General Terms and Conditions of Delivery and Payment, further claims by the customer - on whatever legal grounds - are excluded.

## ***Limitation of liability***

Our liability for damage incurred by the customer from and in connection with the respective contract, in particular for lost profits or other financial harm to the customer, is excluded, unless it concerns personal injury or other damage caused by us or persons acting under our responsibility, through intentional acts or with gross negligence. The exclusion applies in particular to claims due to the violation of secondary obligations. We are not liable for incorrect information in brochures, catalogues and other written documents.

The customer must provide evidence of the existence of gross negligence.

## ***Prohibition on assignment and set-off***

The customer is not entitled to assign its claims from the contract to third parties. Even if the contract is based on the general terms and conditions of our customer that have been expressly recognised in writing, the prohibitions on assignment and all other contractual conditions relating to the assignment of claims shall be deemed null and void and are in any case not covered by our assent.

Furthermore, the customer is not entitled to offset any counterclaims against our claims. The offsetting prohibition does not apply in the event of our insolvency.

## ***General***

Our contracts are subject to Austrian law to the exclusion of the UN Convention on Contracts for the International Sale of Goods and the provisions on conflict of laws. The competent court for STEYR ARMS GmbH is agreed as the exclusive place of jurisdiction for legal disputes.

Changes and additions to contracts must be made in writing in order to be legally effective.

The order processing takes place with the aid of automatic data processing. The customer gives its express consent to the processing of data that has been disclosed to us in the context of contractual relationships and that is necessary for processing of the order. Furthermore, the customer gives its express consent in accordance with Section 107 (1) of the Austrian Telecommunications Act (TKG) that we may transmit information and advertising material regarding our products to the customer electronically.

Pursuant to Section 28 of the Austrian Data Protection Act (DSG), the customer is entitled to object at any time to the use of its data, if such use would violate the customer's overriding legitimate interests that arise from its particular situation. Furthermore, in accordance with Section 107 (1) TKG, the customer is entitled to revoke its consent to the transmission of information and advertising at any time.

The customer undertakes to notify us immediately of any changes to its email address or mailing or street address. If the customer does not duly comply with this obligation, all declarations made by us are deemed to have been received by the customer when they are sent to the e-mail address or mailing or street address last made known to us.

The customer expressly waives the right to contest contracts on the basis of *laesio enormis* or mistake.

Should one or more provisions of these General Terms and Conditions of Delivery and Payment be or become ineffective, or should these contain a gap, the ineffective or incomplete provision shall be replaced or supplemented by an appropriate provision that largely corresponds to the economic purpose of the intended provision. The same applies to any gaps in the contract. The validity of the remaining provisions remains unaffected hereby.
